In 2013, Manea Senior College’s NEW Health and Medical Specialist Program will begin, with only 30 places available each year. MSC is the only secondary school in Western Australia that offers the Health and Medical Specialist Program.

Dedicated and enthusiastic students will receive hands on, practical experience in their area of focus, as well as vital skills and knowledge for a career in the health industry. Through our Specialist Program, students will experience hospital and health provider visits, university tours and lectures and the chance to observe health professionals in action.

Students select courses of their choice for Year 11 and 12, plus our Health and Medical Specialist Program, giving them the chance to head towards further study at university or TAFE (SWIT).
